PROFESSIONAL SUMMARY

OSCP+ and eJPTv2 certified cybersecurity professional with a strong offensive foundation. I simulate real-world attack chains to understand how threats operate, giving me practical insight into detection and defense. I maintain a public portfolio of 70+ penetration testing reports with CVSS scoring and executive summaries. Networking knowledge (Cisco) supports traffic analysis and attack vector identification. Seeking a Penetration Testing or SOC/Blue Team role where I can apply an attacker's perspective to strengthen security.

CERTIFICATIONS

- **OSCP+** — Offensive Security (2026)
 - **eJPTv2** — eLearnSecurity / INE (2025)
 - **Cisco Networking Essentials** — Cisco Networking Academy (2023)
-

TECHNICAL SKILLS

- **Offensive:** Web App Testing (OWASP Top 10), Network Pentesting, Active Directory Attacks (Kerberoasting, Pass-the-Hash, AS-REP Roasting, LLMNR Poisoning), Privilege Escalation (Windows/Linux), Burp Suite Pro, Metasploit, Nmap, BloodHound.
- **Detection & Analysis:** Windows Event Log analysis (4624, 4625, 4672, 7045), IoC identification, Wireshark traffic inspection, MITRE ATT&CK mapping.
- **Networking:** TCP/IP, Cisco routing/switching fundamentals, packet-level analysis.
- **Scripting:** Python (automation, exploit modification), Bash, PowerShell.
- **Reporting:** Professional penetration testing reports, CVSS v3.1, executive summaries, remediation roadmaps.

PROFESSIONAL EXPERIENCE

Independent Security Researcher & Pentester

Self-Employed / Remote | 2024 – Present

- Delivered 70+ penetration testing reports based on hands-on exploitation (Hack The Box, Proving Grounds), following structured penetration testing methodology with executive summaries, CVSS scoring, proof-of-concept, and remediation guidance. Full portfolio: jonas-fernandez-as.github.io
 - Simulated multi-stage Active Directory attacks, mapping TTPs to MITRE ATT&CK and identifying corresponding Windows Event Logs and network indicators relevant for detection engineering.
 - Peer-reviewed reports with senior industry professionals to align documentation with consultancy standards.
 - **YouTube Creator** (youtube.com/@JonaStrikeX): Produce cybersecurity educational content focused on accessible tool explanations. Demonstrates ability to communicate complex technical topics to non-technical audiences—applicable to client reporting and security awareness training.
-

EDUCATION

- **Hack The Box Academy** — Penetration Testing & Defensive Analysis Paths (2024–2025)
 - **PortSwigger Web Security Academy** — Web Application Security Labs (2023–2024)
 - **Offensive Security** — PEN-200: Penetration Testing with Kali Linux (2025)
 - **Cisco Networking Academy** — Networking Essentials (2023)
-
