PROFESSIONAL SUMMARY

Customer-focused IT & Cybersecurity Associate with a strong foundation in Network Troubleshooting (Cisco), Incident Triage, and Documentation. eJPT certified. Leverages extensive offensive security training (70+ labs) to provide proactive defense and deeper root-cause analysis. Proven ability to produce high-quality technical reports and communicate complex solutions to non-technical users. Seeking a SOC L1, Helpdesk, or Junior Analyst role to apply analytical skills and safeguard organizational assets.

CORE COMPETENCIES

- **IT Support & Troubleshooting:** Ticket triage, Windows/Linux OS hardening, User Access Management (Active Directory basics), Remote Support tools.
- **Security Operations (SOC):** Log Analysis basics, Incident Response lifecycle (NIST), Phishing analysis, Alert Triage, Network Traffic Analysis (Wireshark).
- **Vulnerability Management:** Identifying security gaps, CVSS scoring, prioritizing remediation, understanding attack vectors (OWASP Top 10) to prevent breaches.
- **Documentation:** Creating knowledge base articles, incident reports, and technical guides (See Portfolio).

CERTIFICATIONS

- **eJPT v2 (Junior Penetration Tester) | eLearnSecurity | 2024**
Key relevance: Deep understanding of TCP/IP, Routing, and Network Assessment.
- **Cisco Networking Essentials | Cisco Networking Academy | 2023**
- **PEN-200 (OSCP) | Offensive Security | Candidate (In Progress)**

PRACTICAL EXPERIENCE & LABS

IT Support & Technical Content Creator (Independent) Remote | Jan 2024 – Present

- **Technical Communication:** Produce educational video tutorials on cybersecurity concepts and troubleshooting, demonstrating the ability to explain technical issues to diverse audiences.
- **Documentation & Reporting:** Authored 70+ detailed technical reports analyzing system vulnerabilities. This experience translates directly to incident reporting and ticket documentation in a corporate environment.
- **See sample report in header link.**
- **Community Troubleshooting:** Provide ad-hoc diagnosis and resolution for connectivity and software issues within technical communities.

Security Research & Lab Simulation (Defensive Focus) Self-Study / Home Lab | 2023 – Present

- **Vulnerability Analysis:** Conducted security assessments on 70+ environments (HTB/Proving Grounds). Unlike typical pentesting, focused on understanding the "Why" and "How" of vulnerabilities to recommend effective mitigation and patching strategies.
- **Network Analysis:** Utilized Wireshark and Nmap to analyze traffic patterns, identifying anomalies typical of malicious activity.
- **System Hardening:** Practiced privilege escalation techniques to understand how to better secure Windows and Linux permissions and configurations.

EDUCATION

- **Hack The Box Academy | Security Analyst & Pentesting Tracks | 2025**
- **Self-Study | Focus:** Networking protocols, Active Directory Administration, Bash/Python scripting for automation.

LANGUAGES

- **English:** Professional Working Proficiency (B2)
- **Spanish:** Native
- **Italian:** Fluent (B2)
