PROFESSIONAL SUMMARY

Practical and methodical Junior Pentester certified with eJPTv2 and currently pursuing OSCP. Differentiated by strong reporting discipline: authored 70+ professional vulnerability reports based on Hack The Box/Proving Grounds simulations. Proficient in Web Application testing (OWASP Top 10), Active Directory enumeration, and Privilege Escalation. seeking a Junior Pentester role to leverage strong documentation skills and offensive security methodology.

TECHNICAL SKILLS

Offensive Security: Web App Testing (SQLi, XSS, IDOR, Command Injection), Network Pentesting, Active Directory Attacks (Kerberoasting, LLMNR Poisoning), Privilege Escalation (Windows/Linux), Metasploit, Burp Suite Pro.

Networking & Systems: TCP/IP Deep Dive, Cisco Routing/Switching basics, Nmap scripting, Wireshark traffic analysis, Linux Administration (Bash scripting), Windows Internals.

Tools & Scripting: Python (Automation/Exploit modification), Bash, PowerShell, Git, Docker.

Documentation: OSCP-style Reporting, Risk Assessment, Remediation Recommendations, Executive Summaries.

CERTIFICATIONS

eJPT v2 (Junior Penetration Tester) | eLearnSecurity | Issued: 2025

PEN-200 (OSCP) | Offensive Security | Candidate (**Course in progress, expected 2026**)

Cisco Networking Essentials | Cisco Networking Academy | 2023

PRACTICAL EXPERIENCE & PROJECTS

Security Researcher & Content Creator (Independent) Self-Employed / Remote | Jan 2024 – Present

Acting as a full-time pentester in a simulated environment to build industrial-grade competence.

- **Vulnerability Reporting Factory:** Authored 70+ professional-grade pentest reports mimicking real-world engagements. Structured reports include Executive Summary, Technical Findings (CVSS scoring), Proof of Concept, and Remediation. **Evidence:** jonas-fernandez-as.github.io/REPORTS/Hard/Flight%20report.pdf
- **Lab Exploitation:** Compromised 70+ machines on Hack The Box and Proving Grounds, focusing on manual exploitation over automated tools to prepare for OSCP.
- **Technical Communication (YouTube):** Created and edited technical walkthroughs explaining methodology and remediation to a community of learners, demonstrating clear communication of complex technical concepts.
- **Collaboration:** Collaborated with senior professionals via LinkedIn to peer-review reports, refining technical writing style to meet industry standards.

Community IT Support & Troubleshooting Freelance / Community | 2024 – Present

- **Provided** ad-hoc technical support for software and networking issues within community channels.
- **Diagnosed** connectivity issues and performed malware removal/system hardening for private clients.

EDUCATION

- **Hack The Box Academy** | Penetration Testing Track | 2025
- **Self-Study** | Focus on PortSwigger Web Security Academy & Active Directory labs.

LANGUAGES

- **English:** Professional Working Proficiency (B2)
- **Spanish:** Native
- **Italian:** Fluent (B2)
